INTRODUCTION

GT-CT8900 is an intelligent combustible gas detector that adopts the smart sensor technology and features a safety function automatically identifies and determines the remaining usage life of the sensor.

GT-CT8900 also features the detection of different gas concentrations and provides a real-time fault diagnosis to ensure safe and effective operations

GT-CT8900 can monitor combustible gases presence consistently and continuously in installation sites. It provides 4-20mA current output and three sets of relay contacts for Warning/Alarm/Fault. In addition, there are dual redundant Modbus and HART communication interfaces for data transfer to third party system.

Ease of Use

- One person adjustment-free calibration
- Multiple gas type support

Multiple Outputs

- 4-20mA analog output
- Warning, Alarm and Fault Relay
- Redundant modbus and HART

Highly Reliable

- Event logging
- Real time fault diagnosis
